“Fun is an important factor in the learning process. No fun is a closed door, whereas fun is an open door.”

One of the main objectives of the project STEP is to popularize science, research and development and their results. It aims at those who are interested in Research and Development (R&D) and students' motivation to study technical and natural sciences on elementary and secondary level, and subsequently interested in work in the field of R&D.

Project STEP wants to communicate science and technology in understandable way to the target groups and develop cooperation among elementary and secondary schools across the Czech Republic.

Project key activities:

KA1 – Lecture of Modern Science

KA2 – Science in the arena

KA3 – Seminars for Elementary and Secondary School Teachers

KA4 - Science Popularization Educational Materials for Teachers and Students

KA5 - Excursions

KA6 – Science Competition

KA7 – Workshops for Scientists and Journalists

KA8 – summer Science Camp

KA9 – Science Fairs and Lectures
